

ZRT Labs
Neurotransmitters--\$272
(Dried Urine)

A home-collection test to assess neurotransmitter levels that affect overall health and well-being.

ZRT's testing reveals an individual's level of neurotransmitters, the body's chemical messengers that influence mental processes, energy and emotions. This test is ideal for people experiencing:

- Mood disorders—anxiety, depression
- PMS/PMDD (women)
- Addictive Behavior
- ADD/ADHD
- OCD
- Insomnia
- Menopausal symptoms (women)
- Adrenal dysfunction—fatigue, burnout

Neurotransmitter profile tests for:

- GABA
- Glutamate
- Glycine
- Dopamine
- Epinephrine
- Norepinephrine
- Normetanephrine
- Histidine
- Histamine
- 5-Hydroxyindoleacetic acid
- B-phenylethylamine
- 3,4-Dihydroxyphenylacetic acid
- Homovanillate
- 5-Hydroxytryptamine

- N-Methylhistamine
- Vanilmandelate
- Tryptophan
- Kynurenine
- Kynurenic Acid
- 3-Hydroxykynurenine
- Taurine
- Glutamine
- Tyrosine
- Tyramine
- Xanthurenic Acid
- Creatinine
- Serotonin
