Weight Management--\$335 (Saliva and Blood Spot)

A home-collection test to identify hormone imbalances that affect weight control.

An undetected hormone imbalance can defeat weight loss efforts. This test is good for those who have:

Weight gain with belly fat
Weight gain in the hips and thighs
High body mass index
Loss of lean muscle
Increased appetite

Weight Management profile tests for:

Saliva:

- Estradiol
- Progesterone
- Testosterone
- DHEA
- Cortisol (4 times)

Blood Spot:

- TSH
- Vitamin D2
- Vitamin D3
- Insulin
- HbA1C
